# Advanced Vehicle Application Workshop

Vehicle graphics and wraps are some of the most challenging and demanding of applications and require a specialised skill set to ensure they stand the test of time.

This course is designed to ensure you understand all of the variables involved with this critical application and have the confidence to provide your customers with a sound and professional product that looks great.

Starting with an overview of the key considerations and techniques for application to difficult surfaces, we move on to spend the rest of the day completing practical applications to vehicles. The workshop is predominantly hands on training, and will provide knowledge for making the application process quicker and easier, while pointing out the critical areas of importance in this specialised field.

We are dedicated to providing high quality technical support and training to users of all its products. This is achieved by Avery Dennison staff being on hand whenever you need them. All Avery workshops are lead by an experienced Avery Dennison product specialist along with an industry leading professional applicator.
